

The *NEW* Back Cove 32

BACK COVE
YACHTS
Practical Elegance. From Maine.

The new and exciting Back Cove 32 will make her debut in the summer of 2016. Ten years and over 600 hulls after the first Back Cove 29 was launched, this new design offers an elegant and innovative boating style while retaining the basic tenets of the Back Cove range. Her single diesel engine is reliable and fuel efficient and yard bills are minimized with functional and easily maintained systems.

Back Cove has become synonymous with motor yacht cruising in an affordable, easily maintained boat. This practical elegance has appealed to many families whose time on the water includes voyaging to favorite destinations and quiet anchorages. And so while the exterior of the Back Cove 32 is the perfect entertainment place for family and friends, her interior is cozy and luxurious and perfectly suits the needs of the cruising couple.

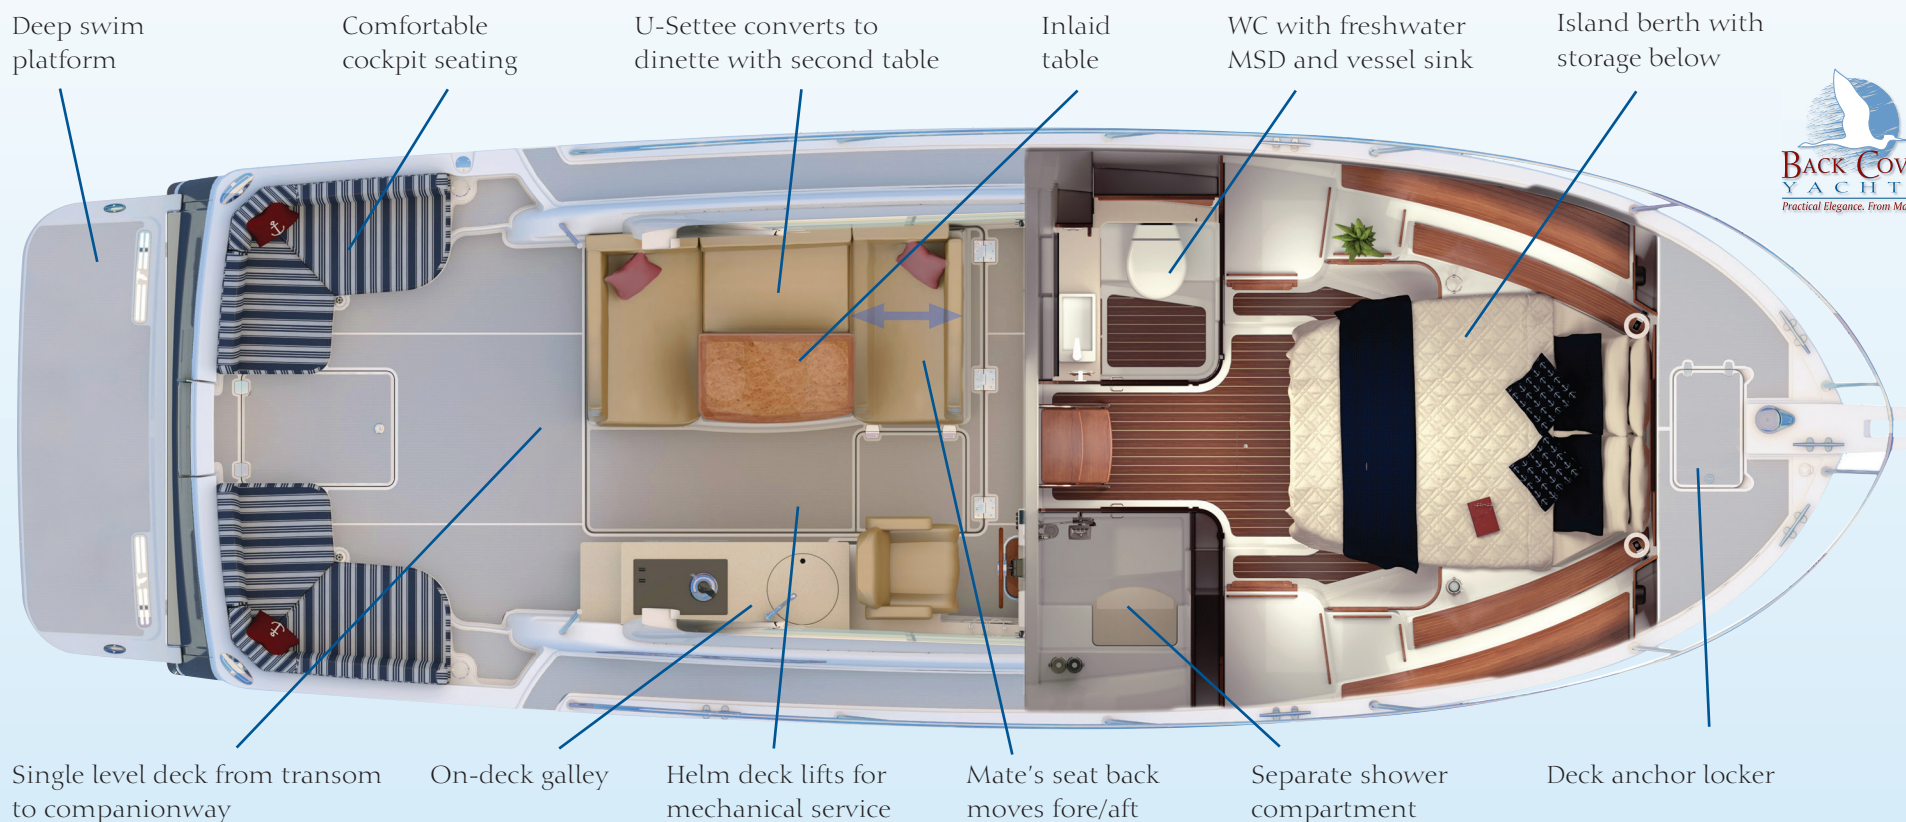

Below deck, Back Coves designers and boat builders have created an elegant American cherry interior, finely finished with satin varnish. A large island berth, a well-equipped WC, and a separate stall shower create an oasis in which to relax in total comfort, away from the hustle and bustle of day to day life. There is ample storage in her many drawers and lockers. A cedar-lined hanging locker keeps garments fresh and ready for that night on the town in your favorite port.

The Back Cove 32

On deck, a fully equipped galley and a convertible dinette are the perfect place to enjoy your meals aboard. The U-shaped settee converts to a dinette as a second table, rises from below the outboard seat. Enjoy the views

underway and breathe the fresh air from large opening windows, a center opening windshield and a sliding hatch overhead. Her inviting cockpit is the ideal spot to relax at the end of another perfect day on the water.
